Core industries

- Chemical
- Food & beverage
- Life sciences
- Oil & gas
- Power & energy
- Primaries & metal
- Water & wastewater

CEO Matthias Altendorf.

Endress+Hauser's head offices in Reinach, Switzerland.

Endress+Hauser has been a reliable partner for the process industry for more than 60 years. We provide comprehensive support to our customers, from the laboratory to the process.

Our core expertise lies in the fields of process instrumentation and laboratory analysis. With our products, solutions and services, we help our customers design safe, reliable, efficient and economically friendly processes across the entire life cycle. Our customers value our deep understanding of their applications and the special requirements of their industry.

We maintain a close presence to our customers worldwide. With a dense network of our own sales centers, plus select representatives, we guarantee competent support around the globe. Production centers on four continents ensure fast and flexible delivery to our customers, wherever they are located.

Endress+Hauser was founded in 1953 by Swiss engineer Georg H Endress and German banker Ludwig Hauser. The Endress family, the sole shareholder since 1975, plays an influential role in the company's development to this day. And it has a stated objective: Endress+Hauser shall remain a successful family company.

Comprehensive knowledge

Innovative, trendsetting technologies have been the driving force of our company since its origin. We recently strengthened our process analytical business with several acquisitions and established laboratory analysis as a new business area with the takeover of Analytik Jena. The breadth and depth of our offering is unique in the industry.

Cathedral of Basel, Switzerland with the river „Rhein“ in the front

Basel, Switzerland

Basel is situated on the River Rhine and located in the three-country corner of Switzerland, France and Germany. Basel is the third largest city in Switzerland with 200 000 inhabitants.

History

During the days of the Roman Empire, the settlement of Augusta Raurica was founded 15 km upstream of present Basel. The Romans built 30 B.C. a castle overlooking the river where the Basel Münster stands now. Even older Celtic settlements have been discovered in the area of the Münster.

Switzerland first university was founded 1460 in Basel. Notables like Erasmus of Rotterdam and Paracelsus taught at the University. At the same time the new craft of printing was introduced to Basel. Since 1837 the Saline Schweizerhalle (close to Basel) are mined. Salt as a raw material plays an important role in the chemical industry. Therefore various chemical companies settled down in the region of Basel.

Today

Nowadays the most economic power comes from the pharmaceuticals industries as well as from logistic, transportation and financial field. Basel is the most important location for trade fairs and congresses in Switzerland. Basel is one of the cities with the highest quality of life worldwide.

Museums

Basel is very proud of its many museums. No other European city has so many top museums in such a small space (37 square kilometers for almost 30 museums). The various museums cover a wide range of interests but mainly focused in fine art. Collecting art has a long tradition. Basel was the first European city to open the doors of an art collection in 1661.

Apart from the Art Museum some other interesting museum like the Museum of History, Museum of Culture, Museum of Antiquity and Museum of Natural History can be found. Over the last two decades, some private institutions such as the Fondation Beyeler (1997), the Museum Tinguely (1996) and the Schaulage (2003) have made Basel more attractive for the general public.

Architecture

Basel is a city which is conscious of tradition and open to innovation. In the well-preserved Old Town classical patrician residences and medieval churches can be visit. In the meantime modern buildings designed by internationally renowned architects such as Richard Meier, Mario Botta, Renzo Piano or Herzog & de Meuron can be found.

Shopping

Best places for shopping are the shopping malls Stücki and the St. Jakob-Park in Basel. Many jewelry and watch stores can be found at the shopping street Freie Strasse in Basel.
